DIGGER RESOURCES INC. ANNOUNCES FINANCIAL AND OPERATING RESULTS FOR THE NINE MONTH PERIOD ENDED APRIL 30, 2014

CALGARY, June 16, 2014 – Digger Resources Inc. (“DIG” or the “Company”) announces that for the nine (9) month period ended April 30, 2014, net loss and comprehensive loss amounted to \$36,342 (\$0.003 per share) compared to net loss and comprehensive loss of \$96,381 (\$0.008 per share) for the same nine (9) month period last year. It should be noted that share-based compensation for the nine (9) period ended April 30, 2014 was \$19,213 as compared to \$74,968 for the same period in 2013 resultant from the issuance of new options in September 2012. 950,000 options were granted to directors and the CFO under the Company’s Share Option Plan with an exercise price of \$0.15 per share. Share-based compensation represents a non-cash charge resulting from applying the fair value method on stock options issued. Under this method, compensation expense related to these programs is recorded in the statement of operations over their respective vesting periods.

Financial Highlights - The following table includes selected financial data for the third quarter and nine-month period ended April 30, 2014 and 2013 (in **Canadian \$ - unaudited**).

Information from the Consolidated Statements of Operations and Deficit	Third Quarter Ended April 30	Third Quarter Ended April 30	Nine month period ended April 30	Nine month period ended April 30
	2014	2013	2014	2013
Revenues	-	-	-	-
Net Income (Loss) and comprehensive loss	(8,464)	(25,508)	(36,342)	(96,381)
Income (Loss) per share – basic and diluted	(0.001)	(0.002)	(0.003)	(0.008)
Information from the Consolidated Statements of Cash Flows				
Cash flows relating to operating activities	(7,496)	(8,275)	(42,528)	(47,359)
Information from the Consolidated Balance Sheet				
Cash equivalents and short term investments	35,391	82,244	35,391	82,244
Working Capital (deficiency)	35,073	82,608	35,073	82,608
Total Assets	36,935	84,486	36,935	84,486
Long term debt, including current portion	Nil	Nil	Nil	Nil
Total liabilities	514	Nil	514	Nil
Shareholder’s equity (Deficiency)	36,421	84,486	36,421	84,486

The Company's unaudited interim condensed consolidated financial statements for the period ended April 30, 2014 have been prepared in accordance with International Accounting Standards issued by the International Accounting Standards Board and interpretation of the International Financial Reporting Interpretations Committee. The financial information in regards to the three and nine-month periods ended April 30, 2014 should be read in conjunction with the Company's Management's Discussion and Analysis dated June 16, 2014. These documents are available at www.sedar.com and on the Company's website at www.diggerresources.com.

Update

High Definition Reservoir Geochemistry ("HDRG") orientation surveys for four (4) fully integrated international petroleum companies ("IPCs") in the Middle East are underway. The HDRG orientation surveys consist of 555 just collected samples. In order to effectively evaluate the potential offered by HDRG, surveys over both dry and oil filled structures have been undertaken to determine whether the results from these HDRG surveys match the subsurface hydrocarbon distribution. The orientation surveys will be subjected to a rigorous chain of custody set of procedures, thus ensuring that there is no way in which DIG could interfere or tamper with the collection, shipping, analysis or interpretation of the results from this study. There will be no payment to DIG by the IPCs unless the HDRG survey outcomes include:

1. Confirmation from the IPCs that HDRG anomalies corresponded with known oil and gas production reservoirs; and
2. Confirmation from the IPCs that HDRG generated anomalies showed previously recognized and new element signatures.

If the IPCs in fact confirm that the HDRG surveys were a success they will pay to DIG \$200 per sample collected and analyzed within 30 days of said confirmation. This could, assuming that all of the 555 samples collected are analyzed, result in revenues to DIG of CD \$111,000 and significant follow-up HDRG surveys. It is estimated that the analyses of the soil samples will be completed in July 2014.

About HDRG

The goal of DIG's HDRG program of work has been to develop a rapid cost effective exploration technique through the detection of metallic and non-metallic ions in near surface soil profiles. The presence of various metallic and non-metallic ions forming geochemical signatures directly above oil and gas accumulations has been well documented by industry. In the past it has been difficult to measure these anomalies both accurately and with a high degree of repeatability, which has severely hampered its applicability and value for hydrocarbon exploration. The work completed by DIG has shown that the application of its proprietary metallic/non-metallic ion deep penetrating geochemistry program has successfully addressed previous problems in applying soil geochemical techniques when exploring for oil and gas reserves.

HDRG technology is based on the collection and analysis of near surface soil samples using its proprietary customized ionic HDRG leach and ultra low-level Inductively Coupled Plasma analyses. HDRG now has the ability to measure a number of isotope species at surface, via technology transfer from successful ionic geochemical metal exploration studies. This potentially provides DIG with an opportunity to 'isotopically fingerprint' and define different sources (ages) of hydrocarbons. HDRG is an additional tool in determining the presence of hydrocarbons at depth and has the potential to offer a significant technological advance in the search for oil and gas reserves in new

and mature fields. DIG's management is of the view that HDRG technology is now functional at a commercial level, cost effective, robust and reproducible and remarkably effective given the early stage of its commercial application for petroleum exploration.

Outlook

The Company will continue to closely monitor its level of cash while targeting a capital structure allowing for the realization of its business plan including the sales and marketing of its HDRG technology. By increasing its visibility and brand awareness through its association with ALS, DIG believes that its business will eventually experience sustained growth.

The Company closed a non-brokered private placement financing in August 2011 and the gross proceeds from the private placement were used by the Company to strengthen the corporate balance sheet, to enhance the Company's marketing efforts of its HDRG technology, to re-pay unsecured advances to related parties and for general working purposes. The financing provided DIG with sufficient capital resources to ensure the continuity of its operations over the next twelve (12) months. By the end of 2014 the Company should see advancement in the use of HDRG technology and that DIG will then be able to raise funds through increased HDRG surveys on a fee for service basis and obtain additional equity financing to further develop and market its HDRG technology to vendors. While there can be no assurance that these initiatives will be successful, management believes that future HDRG surveys and management and related party funding will contribute adequate cash flow.

Investor Information

The Company is a reporting issuer in Alberta and British Columbia and trades on the NEX board of the TSX Venture Exchange under the symbol "DIG.H". DIG currently has 11,349,035 fully issued and outstanding common shares and 950,000 options that are all vested and outstanding. Additional information regarding Digger is available under the Company's profile at www.sedar.com or at the Company's website at www.diggerresources.com.
