June 26, 2015

PRESS RELEASE – FINANCIAL AND OPERATING RESULTS FOR THE NINE MONTHS ENDED APRIL 30, 2015 & UPDATE

Calgary, Alberta - Digger Resources Inc. (“DIG” or the “Company”) announces the recent filing of the Company’s unaudited interim condensed consolidated financial statements and the Management’s Discussion and Analysis for the nine (9) month period ended April 30, 2015. These documents can be accessed on the SEDAR website at www.sedar.com or on the Company’s website at www.diggerresources.com. The Company’s unaudited interim condensed consolidated financial statements for the period ended April 30, 2015 were prepared in accordance with International Accounting Standards issued by the International Accounting Standards Board and interpretation of the International Financial Reporting Interpretations Committee.

The Company’s principal business activity is, through the application of its High Definition Reservoir Geochemistry technology (“HDRG”), the development of an effective exploration technique as an adjunct to existing seismic methods to assist in the environmentally sound discovery and development of new oil and natural gas reserves through the detection of metallic and non-metallic ions in near surface soil profiles.

The Company has entered into negotiations with KAID Investment Group (“KAID”) and KAUST University Innovation Centre (“KAUST”) for a proposed joint venture concerning the use of DIG’s HDRG technology. KAID is a highly successful business group with operations in the Kingdom of Saudi Arabia and elsewhere that has developed a core group of companies active in oil and gas services, industrial services and support, contracting and construction, environmental services and consulting, minerals analysis services (ALS Arabia), insurance and financial services and real estate development. KAUST is a highly regarded international post graduate university with strong emphasis on its Innovation and Economic Development programs which facilitate effective transfer of technology via the KAUST Research & Technology Park that provides the physical infrastructure for start-ups and major industrial tenants who are building research and development centres at KAUST. DIG along with these partners is looking to create businesses that may include but not limited to the following activities:

1. Undertake HDRG sampling programs in the Americas and Middle East to:

- Identify business opportunities to benchmark existing wells and further evaluate anomalies generated by HDRG surveys; and
- After evaluation of the HDRG surveys, if warranted, acquire petroleum and natural gas leases and fund or farm out to third parties the costs of drilling, completing and tying in of wells.

2. Conduct market evaluation to establish the viability of a 'fee for service' business;
3. Progress the opportunity to establish a commercial company presence at the KAUST Innovation Centre that would provide DIG with very cost competitive logistics, office and scientific services to allow continued technology development along with contact with potential customers in residence.

Although talks are progressing, significant terms and conditions are still under negotiation. Accordingly, there can be no guarantee that the Company will conclude this transaction. Further, the timing of completion of any such transaction remains uncertain. If acceptable terms and conditions can be negotiated DIG will not be providing any further public statement regarding this transaction until a definitive agreement has been executed or the negotiations have been abandoned.

As earlier reported five (5) HDRG orientation surveys were completed for companies with interests in Oman, to evaluate the effectiveness of HDRG surveys. The terms for this work stipulated that a successful outcome for the survey work should confirm HDRG anomalies:

1. Corresponded with known hydrocarbon production reservoirs;
2. Showed previously recognized and new element signatures.

Provided a successful outcome could be demonstrated a "fee for service" payment of CAD\$110,000 could be levied. The findings from the surveys have been presented to participants in report format, and subsequently DIG has been advised by the coordinator of the work from the Omani Ministry of Oil & Gas, that all parties are now evaluating the results presented in the reports. As expected this information has generated a number of questions from the participants which are now being collated and will in due course be forwarded to DIG for comment and explanation. The outcomes from this work will add to DIG's expanding global case history portfolio that can be drawn on for either internal use, or for presentation to prospective clients should a 'fee for service' business model be pursued.

The Company is a reporting issuer in Alberta and British Columbia and trades on the NEX board of the TSX Venture Exchange under the symbol "DIG.H". DIG currently has 11,349,035 fully issued and outstanding common shares and 950,000 options that are all vested and outstanding. Additional information regarding DIG is available under the Company's profile at www.sedar.com or at the Company's website at www.diggerresources.com.

ON BEHALF OF THE BOARD OF DIRECTORS OF DIGGER RESOURCES INC.

Certain information in this news release is forward-looking within the meaning of certain securities laws, and is subject to important risks, uncertainties and assumptions. This forward-looking information includes, among other things, information with respect to the Company's beliefs, plans, expectations, anticipations, estimates and intentions, including the listing and trading of the Company's common shares on the TSX Venture Exchange. The words "may", "could", "should", "would", "suspect", "outlook", "believe", "anticipate", "estimate", "expect", "intend", "plan", "target" and similar words and expressions are used to identify forward-looking information. The forward-looking information in this news release describes the Company's expectations as of the date of this news release.

The results or events anticipated or predicted in such forward-looking information may differ materially from actual results or events. Material factors which could cause actual results or events to differ materially from such forward-looking information include, among others, the Company's ability to engage and retain qualified key personnel, employees and affiliates, to obtain capital and credit and to protect its property rights.

The Company cautions that the foregoing list of material factors is not exhaustive. When relying on the Company's forward-looking information to make decisions, investors and others should carefully consider the foregoing factors and other uncertainties and potential events. The Company has assumed a certain progression, which may not be realized. It has also assumed that the material factors referred to in the previous paragraph will not cause such forward-looking information to differ materially from actual results or events. However, the list of these factors is not exhaustive and is subject to change and there can be no assurance that such assumptions will reflect the actual outcome of such items or factors.

"Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release."
